

## Lifestyle Boats

Undoubtedly one of the most impressive boats in the multihull category, and arguably the one boat that probably best embraces the very ideal of the configuration, is the Lifestyle Boats example from the Sunshine Coast manufacturer of the same name. Company owner Chris Reynolds has been to virtually every Boat Show this season, over the length and breadth of Australia, and the response to his boat has been nothing short of spectacular. A brilliant design, with brilliant innovation throughout, the Lifestyle is a boat that beckons you aboard. Reynolds

currently has just the one model in his range, the 6700 All-rounder, and as the name suggests it is the perfect 'vehicle' for every occasion, whether it be game-fishing, bottom-fishing, water-skiing, diving, entertaining, or simply cruising the days away, its stability, open space and great sea-keeping potential are there for all to see - and appreciate. Spec'd to an obscenely-high level, to a certain extent the Lifestyle is still able to be further enhanced, as the company is happy to custom-build (within reason) to individual requirements.

Options Available (differs with models): Electric toilet, bunks, drop-down table, self-draining cockpit, twin battery lockers, 300 litre fuel tank, moulded pod and duck-board assembly, hydraulic steering, S/S targa, steering wheel and footrests, twin anchor lockers, ice-box seat bases, sink and plumbing, gas stove, bait station, live-well, kill tank, wipers, windscreen washer.
